

Space Plan Redesign Downtown Library

Addendum

1. A question was asked during the walk through regarding the design and ne library furniture as part of the design.

The design should include as much of the existing furniture as possible in the layout design, the design may also include new furniture but should leverage existing furniture as much as possible. The goal of the project is to improve the use of space and identify additional potential space for use and storage. The library is looking for a design and options.
